

Category and criteria for nomination

Inspirational and Innovative Practice

This award is for either an individual, team or care provider who works creatively to develop practice and challenge the normal.

This could be optimising the use of technology or partnership working to develop intergenerational links within the local community as an example.

Things to consider:

- How do they help people and families to stay well connected to each other?
- How do they as an organisation ensure good communication with service users and families?
- How have they brought activities and the community into their service to benefit individuals?
- How do they enable people with support needs to do enjoyable and meaningful things during the day? (*Something different from the normal activities*)
- Has there been any new ways of collaboration and integration with health and care?
- What do they do differently to ensure residents have a voice in the running of the service?
- Think about anything they have done differently during the Covid pandemic.
